Ten individuals from seven families with at least one EOAD case were genotyped at eight polymorphic microsatellite markers on chromosomes 1, 2, 3, 10, and 14. In addition to these markers, the short arm of chromosome 4 was also typed, as this segment of chromosome 4 has been linked to EOAD in an independent study. Informed by previous linkage and association studies of EOAD, a significant lod score ($Z = 2.05$) was detected at the chromosomal region 4p16-q21. In addition, a lod score ($Z = 2.24$) was observed at an earlier-replicated locus on chromosome 3p21, thus providing a total lod score of $Z = 4.05$. When analyzed in the context of known EOAD loci, the chromosome 3 lod score excluded polymorphisms at the EOAD1 locus but would be compatible with the marker BRCA1, suggesting that the locus on chromosome 3p21 is a novel locus with an EOAD linkage signal.Kathleen Nunan Kathleen Nunan (1899 - 15 April 1973) was an Irish Cumann na mBan volunteer and the only female officer to die serving in the Irish Volunteers and the Irish Republican Army (IRA). The IRA had in 1919 formed a women's section, Cumann na m f678ea9f9e
